Product Description

XV20i TruComfort™ Variable Speed

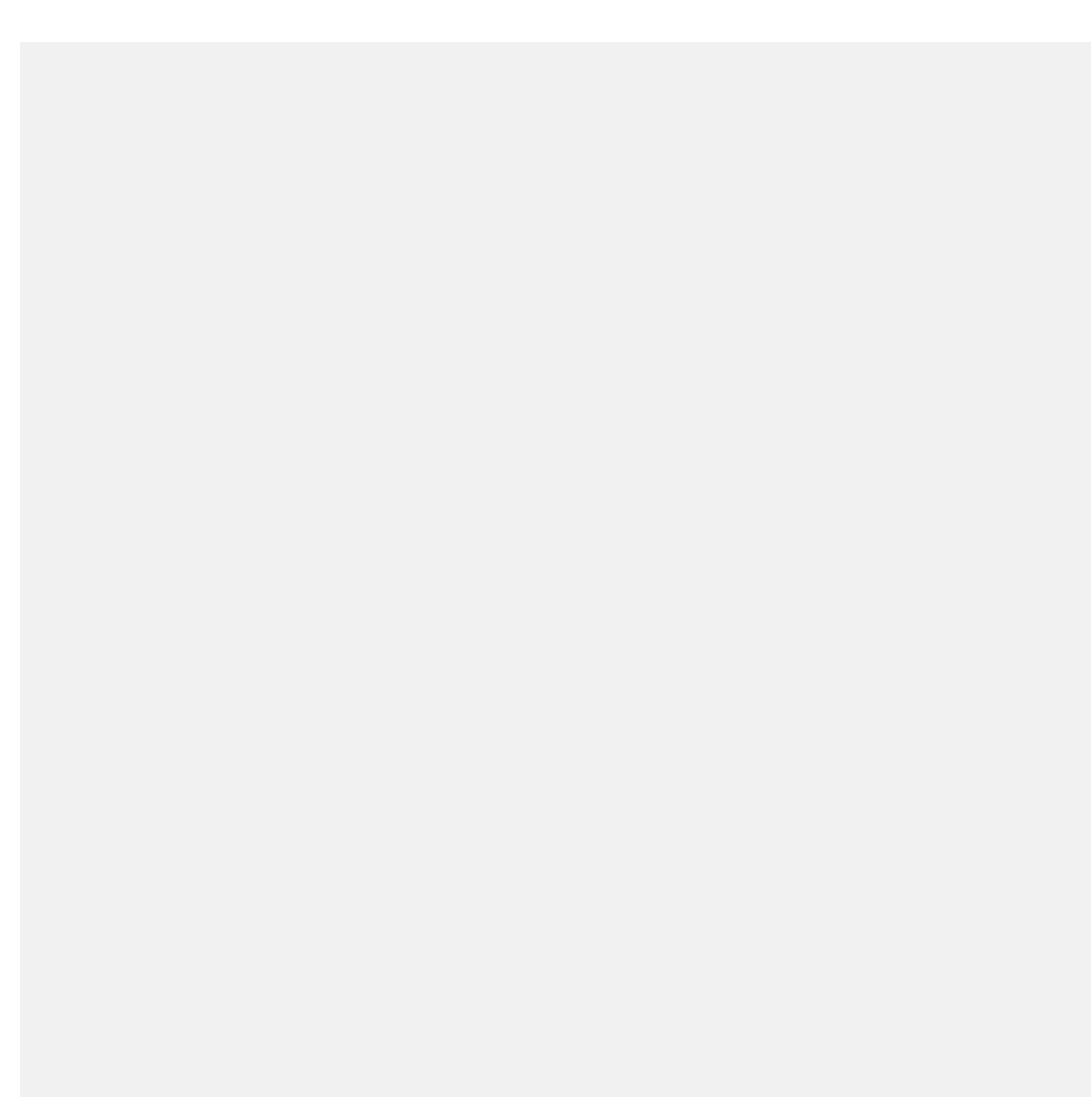

The XV20i TruComfort™ Variable Speed unit is one of the industry's most efficient air conditioners. On the hottest days it cools with precision, keeping you comfortable all day.

- Rated up to 22 SEER with 750 stages of comfort for ultimate climate control and max efficiency
- TruComfort™ technology automatically adjusts temperature while maintaining speeds to avoid temperature swings
- Quiet running fan measured at 4 dB below competitor's minimum

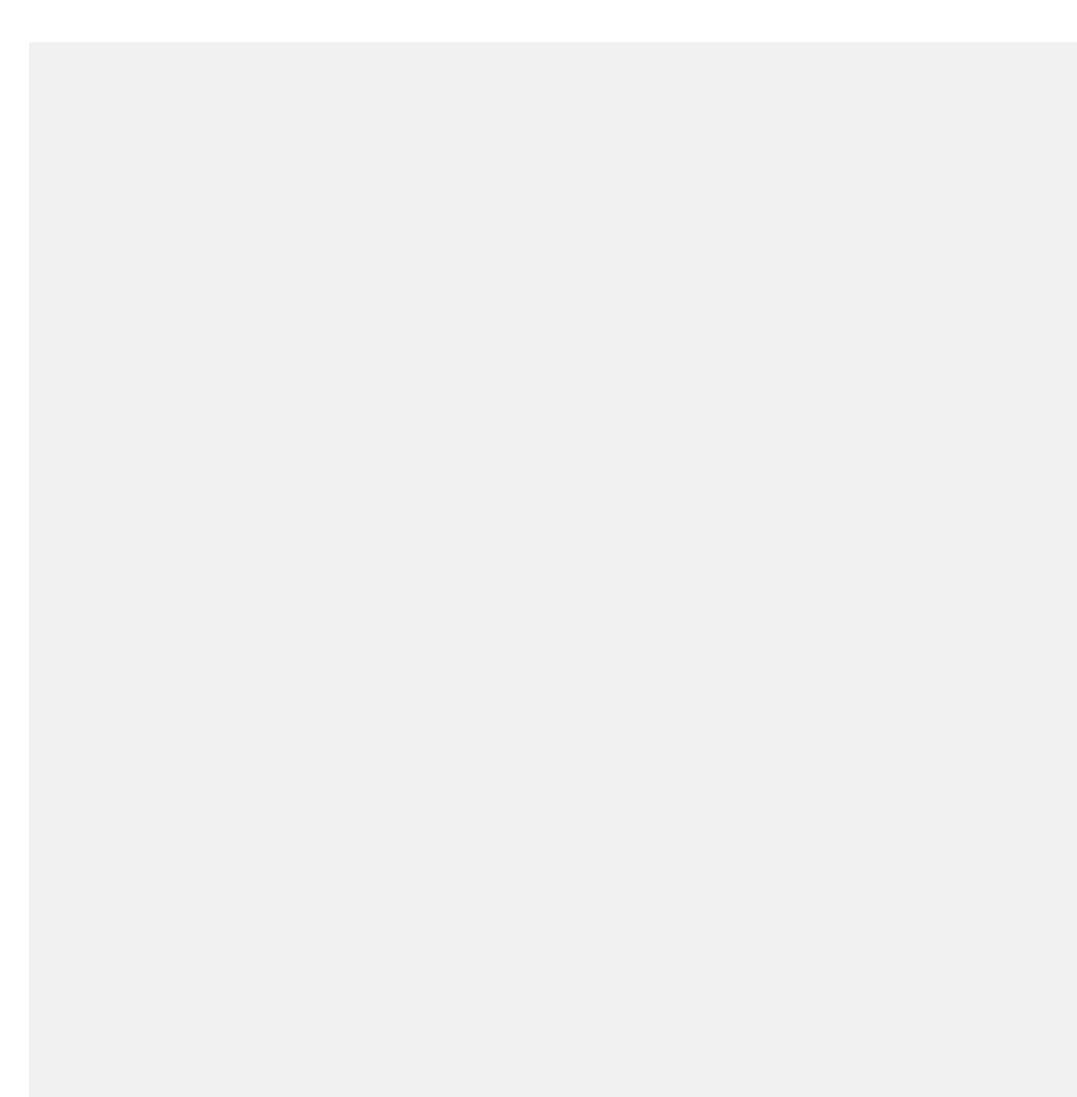

Trane TruComfort™

The Trane TruComfort™ systems give you precise comfort by running at the exact speed needed to keep your home comfortable. This allows the compressor, outdoor fan, and indoor fan to vary operating speed and BTU as the temperature outside changes, slowing down or speeding up gradually in as little as 1/10 of 1% increments to keep comfort within 1/2" of the thermostat setting.

Durable, Quiet, and Economical

Rigorously tortured and tested for long-lasting durability, you can be sure this system will hold up to anything, without holding up your bank account. And with the quiet running fan, 4 dB below other manufacturer's minimum, you can be sure you are getting a quiet air conditioner and the best all-around system for your home.

Efficient performance

The XV20i air conditioner is one of the industry's most efficient systems, with ratings up to 22 SEER. With Trane TruComfort™ technology, the 22-SEER air conditioner automatically adjusts itself while maintaining constant and consistent speeds to avoid temperature swings.

Our Promises

Manufacturers Limited WARRANTY
